

Between Order and Disorder - Program

Wednesday, September 25

- 16:15 - 16:45 Coffee / Welcome
 16:45 - 17:00 Opening
 17:00 - 18:00 Dynamical properties of quasicrystals *Ted Janssen*
-

Thursday, September 26

- 09:30 - 10:30 Existence of the DOS for single site potentials with small support in 1 dimension *Ivan Veselic*
 10:30 - 11:00 Coffee
 11:00 - 12:00 Symmetry analysis and diffraction of random tilings *Christoph Richard*
 12:00 - 14:30 Lunch
 14:30 - 16:00 The quantum hall effect: Edge current channels versus Chern numbers *Johannes Kellendonk*
 16:00 - 16:30 Coffee
 16:30 - 17:00 Planes and Surfaces in icosahedral quasicrystals *Gerald Kasner*
 17:00 - ??? Excursion to Wieck
-

 last update: 23.09.2002

Friday, September 27

- 09:30 - 10:30 Lifshitz tails in magnetic fields *Simone Warzel*
 10:30 - 11:00 Coffee
 11:00 - 12:00 Continuous integral kernels for unbounded Schrödinger semigroups and their spectral projections *Peter Müller*
 12:00 - 14:30 Lunch
 14:30 - 16:00 Complexity measures of aperiodic patterns *Peter Pleasants*
 16:00 - 16:30 Coffee
 16:30 - 17:00 Discontinuities of the IDS for random operators on Delone sets *Steffen Klassert*
 17:00 - 17:30 Matching rules for the Sierpinski gasket *Christoph Bandt*
