

150 μm

This image shows a false-color micrograph of a polycrystalline material. The grains are represented by various colors, including shades of blue, green, yellow, orange, red, magenta, and cyan. The grains vary in size and shape, with some being large and equiaxed, and others being smaller and more elongated. A white scale bar is located in the bottom left corner, with the text "150 μm " above it.
